

Color Brochure

Formulated Colors

With more than 100 formulated colors, All Foils' custom foil printing, coloring and tinting services are a few of the many popular processing and toll processing applications we deliver. We've included examples of the formulated colors we offer in this brochure for your reference. When selecting a color, our in-house team of lab technicians will work with you to create color matching hues and logo prints to meet your needs.

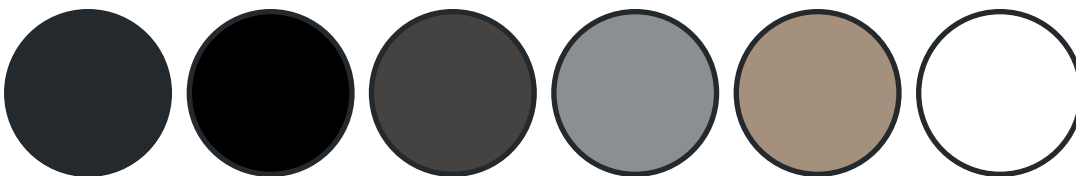

Custom Colors

Searching for something more unique? Our in-house lab technicians can create custom colors, tints and logos to fit your specific needs. To start the color matching process, we need to review and inspect a sample of the color you would like to use. Send us a sample of your preferred color and our team will find a match! Contact one of our foil color and print specialists today for more information about the color matching process.

Please Note: The ability of your monitor and printer to accurately reproduce the colors in this brochure can be influenced by gamma, brightness and contrast settings, your video display card and many other factors beyond our control. The colors in this document can appear differently when printed on foil. Therefore, we cannot guarantee that the colors you see displayed in this brochure are perfectly accurate. Please contact our color and print specialists to have samples sent directly to you.
